RITA EZISI

Frontend Developer | Cross-Platform Application Developer

Nigeria | 08038793200 | ritaezisi7@gmail.com | Open to Remote Opportunities

PROFESSIONAL SUMMARY

Frontend Developer with practical experience in HTML, CSS, C#, .NET MAUI, and XAML, and currently expanding skills in JavaScript, React, and TypeScript. Experienced in building user interfaces, developing cross-platform mobile applications, integrating APIs, troubleshooting technical issues, and improving application usability across Android and iOS. Contributes to cloud-deployed financial technology applications and estate management solutions, alongside an estate security app in development. Combines technical problem-solving with client communication, administration, and project coordination experience.

TECHNICAL SKILLS

Web: HTML5, CSS3, responsive web design.

Currently Learning: JavaScript, React, TypeScript, and modern frontend development practices.

Application Development: C#, .NET MAUI, XAML.

UI Development: Forms, navigation, layouts, reusable components, themes, and cross-platform interface design.

Integration & Tools: API integration, debugging, Visual Studio, Visual Studio Code.

Professional: Problem-solving, communication, teamwork, client relationship management, organisation, and time management.

PROFESSIONAL EXPERIENCE

Appsolute Ltd. — Head of Administration | Software Application Development Support

2024 – Present

- Coordinate administrative operations and support day-to-day business activities.
- Serve as a liaison between the company and its clients, facilitating communication, managing expectations, and supporting client negotiations.
- Contribute to software application development, including interface implementation, testing, and troubleshooting.
- Develop and refine cross-platform mobile application interfaces using C#, .NET MAUI, and XAML.
- Work on navigation, forms, authentication screens, account interfaces, profile displays, and user experience improvements.
- Integrate application interfaces with backend APIs and troubleshoot technical issues across Android and iOS.

SELECTED SOFTWARE PROJECTS

OursMFB — Cross-Platform Mobile Banking Application

Technologies: C#, .NET MAUI, XAML, API integration | **Status:** Cloud-deployed

Contribute to a mobile banking application by building and refining account, balance, authentication, profile, and navigation interfaces; working on API-connected screens; and troubleshooting cross-platform behaviour.

Pyrowo — Financial Technology Application

Technologies: C#, .NET MAUI, XAML, API integration | **Status:** Cloud-deployed

Contribute to interface development and interactive components, including navigation, form handling, authentication, and user-facing improvements; help troubleshoot technical issues across supported mobile platforms.

ChevyviewResident — Estate Management and Resident Services Application

Technologies: C#, .NET MAUI, XAML

Develop resident-facing interfaces for onboarding, identity verification, visitor passes, and estate services; implement screen layouts and navigation; and address mobile interface compatibility issues.

Chevyview Security App — Estate Security and Access Management Application

Technologies: C#, .NET MAUI, XAML | **Status:** In development; not yet cloud-deployed

Contribute to the mobile application's interface and user-facing functionality, including screen layouts and navigation, as development progresses.

EDUCATION

Madonna University, Nigeria — Bachelor's Degree in Pharmacy, 2019

ADDITIONAL STRENGTHS

- Client communication and stakeholder coordination.
- Analytical thinking and technical troubleshooting.
- Ability to learn new technologies and apply them to practical projects.
- Experience balancing administrative, business, and technical responsibilities.

CAREER OBJECTIVE

To secure a remote Frontend Developer opportunity where I can apply my HTML and CSS skills, build on existing software development experience, and continue developing expertise in React, JavaScript, TypeScript, and modern web technologies while contributing to user-focused digital products.
